

Keime und Gerüche effektiv beseitigen

URSACHE DER KEIME UND GERÜCHE BESEITIGEN:

Wo Menschen zusammenleben, können Krankheitserreger leicht weitergetragen werden. Eine gründliche Desinfektion in hygienesensiblen Zonen ist deshalb gerade in Pandemiezeiten sinnvoll.

Keime und Gerüche entstehen oft durch Ablagerungen und können effektiv mit dem richtigen Produkt beseitigt werden. In feuchten Räumen sollten desinfizierende Badreiniger verwendet werden, um die Vermehrung von Bakterien und anderen Keimen zu verhindern und vor Schimmel z.B. in Fugen zu schützen. Effiziente WC-Reiniger beseitigen und verhindern die Bildung von Urinstein und Kalk, die ebenfalls Nährboden von Gerüchen sind, weil sich dort besonders viele Keime tummeln.

Produkte mit bioziden Wirkstoffen

Keine Biozide

Keimreduzierend aufgrund der Inhaltsstoffe

Didecyldimethylammoniumchlorid
0.2 g/100 g
CHZN6147

Ethanol 70 g/100 g
CHZN5860

Didecyldimethylammoniumchlorid
0.1 g/100 g
CHZB0402

Didecyldimethylammoniumchlorid
0.03 g/100 g
CHZB0454

Isopropylalkohol,
Didecyldimethylammoniumchlorid
0.05 g/100 g
CHZB1626

Zinkrizinoat,
Alkyldimethylbenzylammoniumchlorid

< 5% anionische Tenside,
Acrylpolymer, Geruchsvernichter

5% Natriumhypochlorit/
Natronlauge (1% - 5%)
X
250 ml - 500 ml

> 38% geruchsneutrale Milchsäure

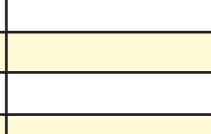

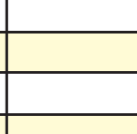

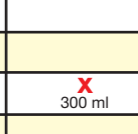

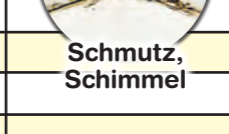

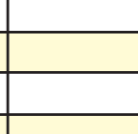

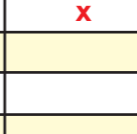

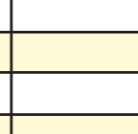

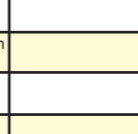

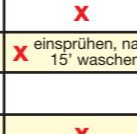

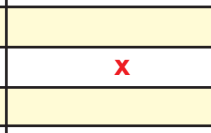

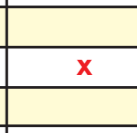

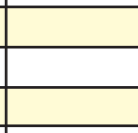

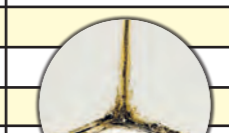

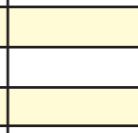

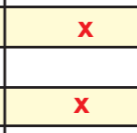

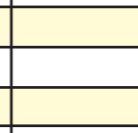

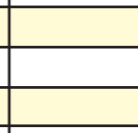

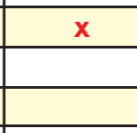

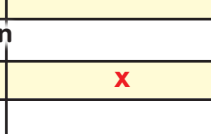

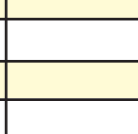

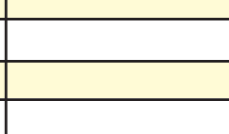

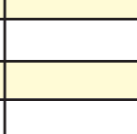

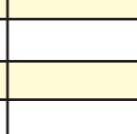

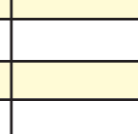

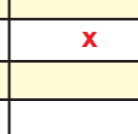

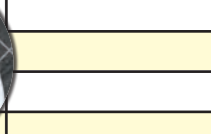

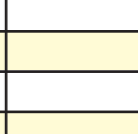

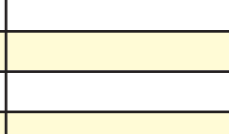

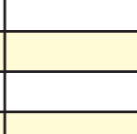

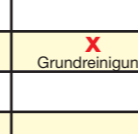

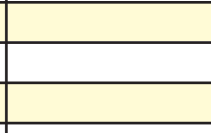

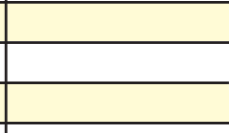

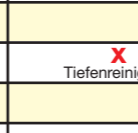

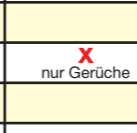

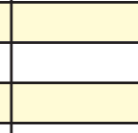

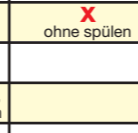

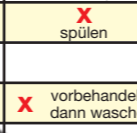

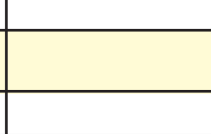

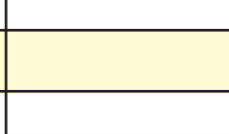

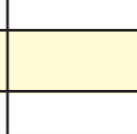

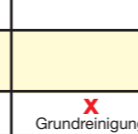

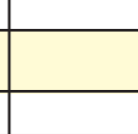

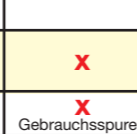

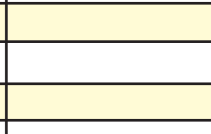

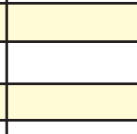

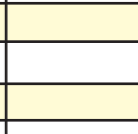

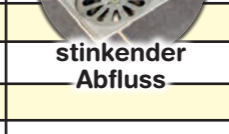

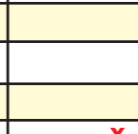

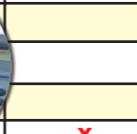

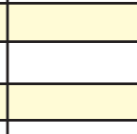

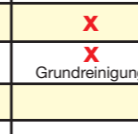

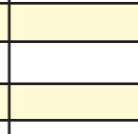

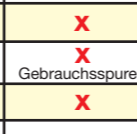

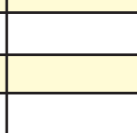

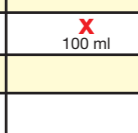

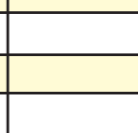

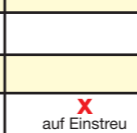

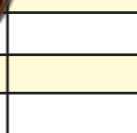

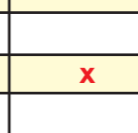

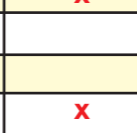

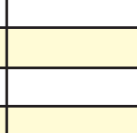

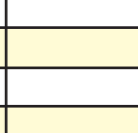

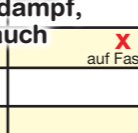

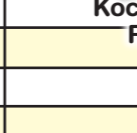

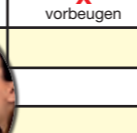

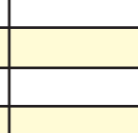

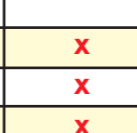

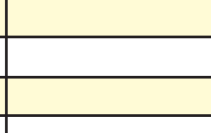

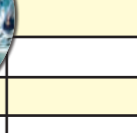

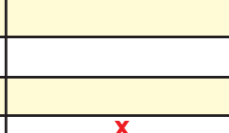

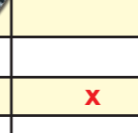

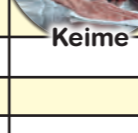

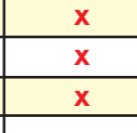

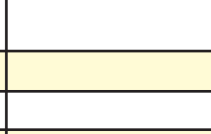

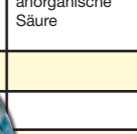

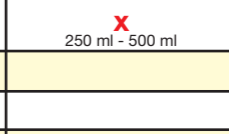

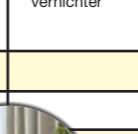

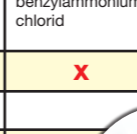

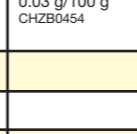

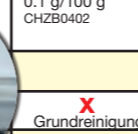

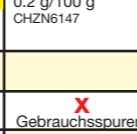

< 5% Methansulfonsäure und anorganische Säure

< 50% Methansulfon- und Phosphorsäure

Gegenstand	Problem
Abflüsse	Abflussreinigung, Gerüche
Anzüge, Hemden, Mäntel, Pullover	Gerüche von Essen, Fettdampf, Rauch
Dampfabzug, Bedienpanel	Gerüche, Fettablagerungen, Keime
Fahrzeuge: Lenkrad, Armaturenbrett, Griffe	Staub, Gebrauchsspuren, Keime
Flächen im Bad	Kalk, Schmutz, Keime
Flächen in der Küche	Fett, Schmutz, Keime
Fugen in Dusche/Bad	Schimmel stoppen, schwarze Fugen desinfizieren
Fussböden	Schmutz, Exkremente, Erbrochenes, Gerüche
Fitnessgeräte, Sportutensilien	Gebrauchsspuren, Keime
Fressplatz von Haustieren	Essensrückstände beseitigen, Keime
Geschirrspüler und Kaffeemaschine	Fett, Kalk, Keime, Schlacken
Hände	Infektionsschutz im öffentlichen Bereich
Katzenklo	Exkremente, Urin, Keime
Kinderstuhl	Gebrauchsspuren, Keime
Kühlschrank	Gebrauchsspuren, Keime, Gerüche
Liege- und Sitzflächen (hart)	Gebrauchsspuren, Keime
Matratzen	Exkremente, Erbrochenes, Gerüche
Mobiles, Tablets, flache Tastaturen, Bildschirme (PC, TV)	Gebrauchsspuren, Keime
Mülleimer	Gebrauchsspuren, Keime, Gerüche
Oberflächen mit Lebensmittelkontakt	Gebrauchsspuren, Keime
Polster, Teppiche	Exkremente, Erbrochenes, Gerüche
Plüschtiere (vor dem Waschen)	Keime, Gerüche
Pulte und Theken	Gebrauchsspuren, Keime
Schneidebrett, Salatschleuder	Ablagerungen, Keime
Schutzscheiben, Plexi- / Acrylglas	Gebrauchsspuren, Keime
Spielsachen	Gebrauchsspuren, Keime
PC Tastaturen, Maus, Telefonzentralen	Gebrauchsspuren, Keime
Toiletten, Pissoirs	Kalk, Urinstein, Keime, Gerüche
Treppengeländer, Türfallen, Griffe, Taster	Gebrauchsspuren, Keime
Turnschuhe	Gerüche und Keime
WC, Pissoirs (Schüssel)	Urinstein, Gerüche
Vorhänge	Gerüche von Essen, Fettdampf, Rauch
Wäschevorbehandlung	Gerüche, Keime
Wäsche desinfizieren alle Temperaturen	Keime vernichten beim Waschen
Waschmaschine	Fett, Kalk, Keime, Schlacken
Wickeltisch	Gebrauchsspuren, Keime
WC-Sitz	Gebrauchsspuren, Keime
